Alkhamisi International investments is a multifaceted service ISO Certified company committed to delivering exceptional solutions across various industries. We manage diverse projects with focus on quality and precision, ensuring that each development meets the highest standards. We are Embracing new technologies and trends to stay ahead in the market, consistently delivering on our promises and ensuring customer satisfaction across all sectors and Pushing boundaries to achieve outstanding results in every projects and service we undertake.

Organizational Overview

A faint, stylized organizational chart is visible in the background. It features a central node at the top, with arrows pointing down to two main branches. The left branch has a circular node, and the right branch has a square node. Further down, these branches lead to more nodes, including circles and squares, connected by arrows, suggesting a hierarchical structure.

History

Founded in 2023, we pioneered innovative and future-ready solutions to Oman's homes and businesses. Shaping the future of businesses since our inception.

Vision & Mission

Our mission is to enhance everyday living through innovative home automation solutions. We envision a world where technology seamlessly integrates with homes, making life easier, safer, and more efficient

Core values & Culture

We are guided by values that prioritize customer satisfaction, innovation, integrity, and sustainability. These core beliefs ensure that we maintain high standards in our products and services

Cognitive Ecosystems with Automation

- **Smart Solutions** – We offer advanced solutions with a flexible platform, integrating intelligent buildings, communities, and real estate through a comprehensive framework.
- **Accessibility** – Appliances are interconnected for automated operation, allowing users to control and optimize routines remotely or with a single touch.
- **Safeguarding & Assurance** – Smart home technology provides proactive protection, detecting hazards and sending instant notifications during critical situations.
- **Power**
- **Optimization** – Appliances and heating link intelligently to cut waste, save energy, and reduce bills.
- **Automated Ecosystem** – Our team builds an automated intelligent ecosystem, delivering hardware, cloud services, software, and AI integration.
- **Integration & Privacy** – The Smart device framework enables partners to create apps or connect systems, with flexible, cost-efficient, and secure deployments.

Services Offered

Home Automation

CCTV Surveillance & Maintenance

Access Control System

Data & Voice System

Fiber Optic System Projects

Intrusion Detection System

Gate Control System

HVAC System

Rolling Shutter Works

Smart Location

Solar System Installation

MEP Solutions(Electrical & Pumping Works)

Management Offices

Integrated Solutions

Voice Control & AI Integration

- Advanced voice control and AI integration enable seamless, intuitive management of home systems, enhancing user experience through personalized automation and real-time adaptability across lighting, security, and climate control.

Mobile App and Remote Access

- Our mobile app offers seamless remote access, enabling users to monitor and control home systems in real-time, enhancing convenience, security, and energy efficiency from anywhere globally.

Energy Management Systems

- Energy Management Systems optimize household energy consumption through real-time monitoring, smart controls, and automation, enhancing efficiency, reducing costs, and supporting sustainable living in integrated home environments.

Centre of Excellence (CoE)

- ❖ Project Management Assistance

- ❖ Front Engineering & Design Development

- ❖ Cost / Feasibility Analysis

- ❖ Installation Services

- ❖ Testing & Commissioning

- ❖ As Built Documentation

- ❖ Annual Maintains Contract

Our Team & Expertise

Project Management & Engineering Team

Our Project Management & Engineering team is skilled in planning, scheduling, and delivering sustainable, cost-effective engineering solutions using modern software tools and engineering practices to guarantee quality and compliance.

Leadership Team

Our leadership team combines decades of expertise in technology, engineering, and business strategy, driving innovation and ensuring seamless integration of smart home solutions tailored for diverse professional needs

Technical Experts

Our technical experts possess extensive experience in IoT, software development, and AI integration, driving innovative home automation solutions tailored to diverse industry standards and client needs.

Customer Support Team

Our Customer Support Team combines technical expertise and strong communication skills, ensuring timely, efficient assistance and personalized solutions to maximize customer satisfaction and system performance.

Installation process

Site assessment & Customization

- Thorough site assessments ensure tailored system designs, optimizing functionality and integration. Customization adapts solutions to specific client needs, enhancing efficiency and user experience across diverse environments

Equipment Setup & Testing

- Equipment setup ensures seamless integration of devices, followed by comprehensive testing to verify functionality, connectivity, and system responsiveness, guaranteeing reliable and efficient home automation performance.

Training & User Guidance

- Comprehensive training ensures smooth adoption, covering system operation, troubleshooting, and customization. Ongoing user support empowers clients to maximize efficiency and fully leverage home automation benefits.

Customer Support Services

Technical Support Channels

- Research, diagnose, document, and resolve technical issues related to software and hardware problems. Guide clients through step-by-step solutions clearly and concisely, ensuring their understanding and satisfaction.

Maintenance and Updates

- Regular maintenance ensures optimal system performance, while timely software updates enhance security features and introduce new functionalities, minimizing downtime and maximizing customer satisfaction.

Warranty and Service Plans

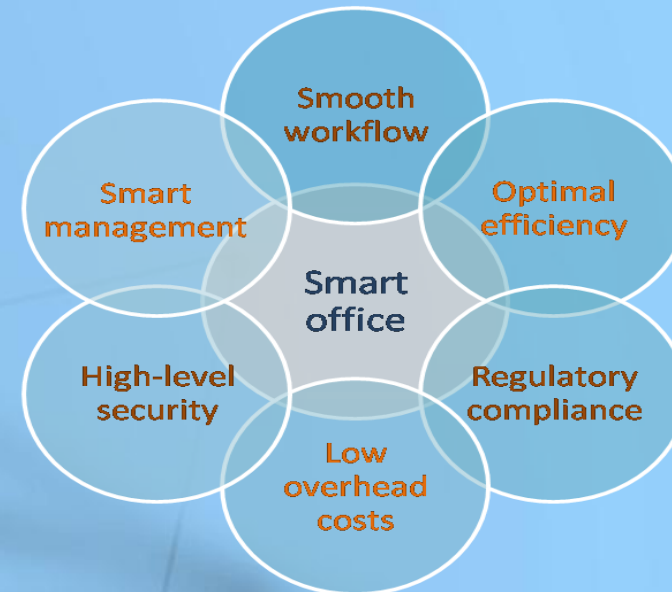

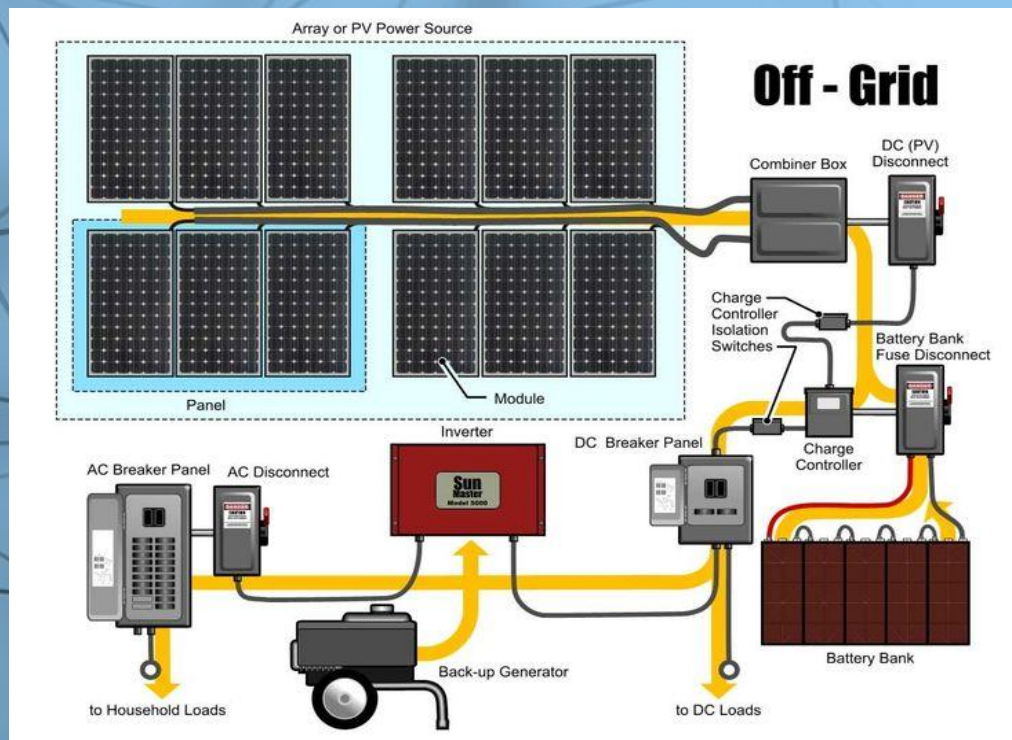

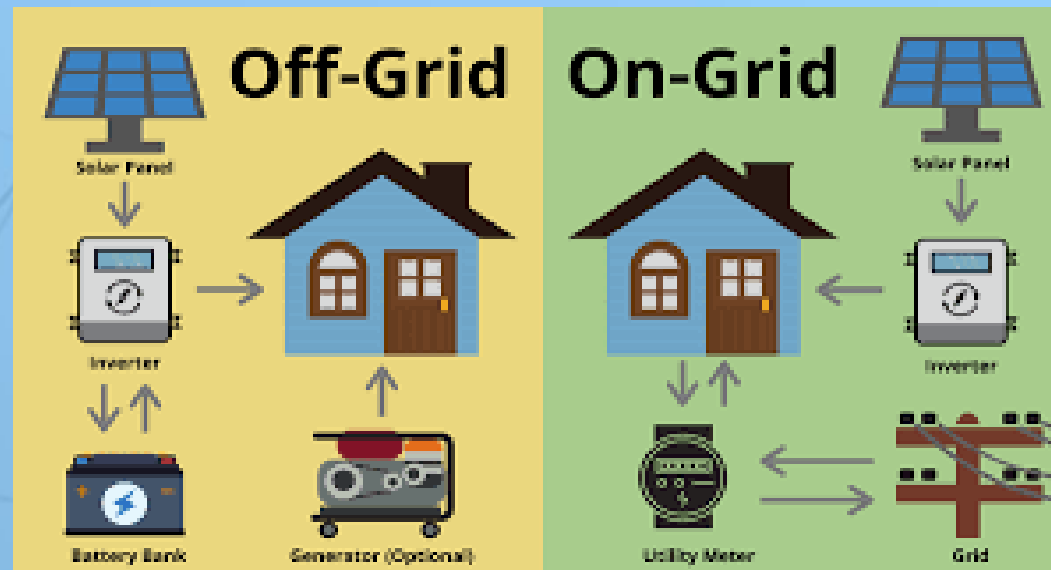

- Comprehensive warranty options ensure product reliability, while flexible service plans provide ongoing technical support, maintenance, and timely updates, enhancing customer satisfaction and long-term system performance.

The background is a dark, deep blue field filled with numerous out-of-focus, glowing bokeh lights in shades of teal, green, and blue. Overlaid on this is a complex arrangement of interlocking gears in various sizes and colors, including yellow, orange, red, and light blue. Some gears are sharp and in focus, while others are blurred, creating a sense of depth and motion. Faint white lines and small dots are scattered throughout, suggesting a network or digital theme.
